How to Interactively Display a Window Label

This operation can be useful to identify the label of a partially hidden window.

- Choose Query Window Label from the Trusted Path menu.**

The screenshot shows a 'Trusted Path' menu with several options: 'Change Login Password...', 'Change Workspace Password...', 'Allocate Device...', 'Query Window Label...' (highlighted with a mouse cursor), and 'Help...'.
- Move the pointer around the screen.**

The label for the region under the pointer is displayed in a small rectangular box at the center of the screen.

The screenshot shows a terminal window titled 'Terminal' with the text 'CONFIDENTIAL : INTERNAL USE ONLY' displayed. A small rectangular box is visible on the screen, indicating the label for the region under the pointer.
- Click the mouse button to end the operation.**
